

CodeAlpha UI/UX Internship

Task 2: High-Fidelity UI Design

Project Title

FoodGo – Food Delivery Mobile Application

Objective

The objective of this project is to transform the low-fidelity wireframe of the FoodGo application into a high-fidelity user interface design. This design focuses on visual aesthetics, usability, consistency, and user experience by incorporating colors, typography, images, icons, and interactive elements.

Tool Used

- Figma

Project Description

FoodGo is a food delivery mobile application designed to provide users with a seamless food ordering experience. The high-fidelity design enhances the application's appearance by using a modern color palette, attractive food images, intuitive navigation, and visually appealing user interface components.

Design Elements Used

Color Palette

The application uses a green-themed color palette to represent freshness, healthy food choices, and positive user experiences.

Typography

Clean and readable fonts were used to ensure better readability and accessibility throughout the application.

Icons and Images

Icons and food images were incorporated to improve visual appeal and help users easily understand the application's functionality.

Buttons and Navigation

Interactive buttons and navigation icons were designed to provide smooth user interaction and easy navigation between screens.

Screens Designed

1. Splash Screen

The splash screen introduces the FoodGo brand using a logo, application name, tagline, and a highlighted “Get Started” button.

2. Sign Up Screen

The sign-up screen allows users to register by entering their credentials. Social media sign-up options are also provided for convenience.

3. Home Screen

The home screen displays food categories and featured food items. Users can browse menu options and explore available food products.

4. Food Details Screen

This screen provides detailed information about the selected food item, including its image, description, rating, and price. Users can proceed to order the item directly.

5. Restaurant Details Screen

The restaurant details screen displays restaurant information such as cuisine type, ratings, location, delivery time, menu items, and contact information.

6. Order Summary Screen

The order summary screen provides a detailed breakdown of the selected order, pricing information, payment methods, and checkout options.

7. Order Success Screen

The success screen confirms successful payment and order placement. It displays a confirmation message and provides navigation back to the application.

User Flow

Splash Screen → Sign Up → Home Screen → Food Details Screen → Restaurant Details Screen → Order Summary Screen → Order Success Screen

Design Approach

The high-fidelity design was developed based on the following UI/UX principles:

- Visual consistency
- User-friendly navigation
- Attractive user interface
- Readable typography

- Effective use of colors
- Improved user engagement
- Responsive layout design

Key Features

- User registration and authentication
- Food browsing and category selection
- Detailed food information
- Restaurant information and menu display
- Order summary and payment options
- Order confirmation and success notification

Benefits of the Design

- Improves overall user experience
- Enhances visual appeal
- Simplifies food ordering process
- Provides intuitive navigation
- Increases user engagement and satisfaction

Conclusion

The FoodGo high-fidelity UI design successfully transforms the initial wireframe into a visually appealing and user-friendly food delivery application. The design incorporates modern UI elements, effective navigation, and engaging visual components to deliver a seamless user experience. This high-fidelity prototype serves as a strong foundation for future development and implementation of the application.
